Profile

As a highly motivated C/C++ developer with over 7 years of experience, I excel at crafting efficient, high-performance software solutions for diverse industries. My most notable accomplishment is the development of a real-time data processing system that boosted productivity by 60% and reduced processing errors by 40%. With my strong foundation in C/C++ and passion for continuous learning, I am dedicated to delivering cutting-edge software that enhances performance and user experience.

Employment History

2016 — 2018: Junior C++ Developer at HighTech Systems

- Worked on the development and optimization of C++ applications, resulting in a 25% increase in software performance and stability.

2018 — 2023: Embedded Systems Developer at RoboticsPro Inc.

- Developed and integrated C/C++ code for embedded systems, contributing to the successful launch of three innovative robotics products.

Education History

2011 — 2015: Elite Tech University

- Bachelor of Science in Software Engineering
- Graduated with Distinction and received the Best Software Engineering Project Award for a high-performance video streaming application.

2016 — 2017: FutureCoders Academy

- PHP & Web Development Certification
- Gained expertise in PHP Frameworks, such as Laravel and Symfony, as well as advanced web development techniques.

Skills

- Detail Oriented
- Team Player
- Initiative and Problem-solving Abilities

Hobbies

- **Open-Source Contributor:** Actively participating in C/C++ open-source projects, honing skills, and contributing to the development.
- **3D Printing:** Designing and creating custom 3D models, exploring the intersection of technology and creativity.
- **Online Gaming:** Engaging in competitive multiplayer games, fostering teamwork, strategy, and quick-thinking skills.
- **Electronics Tinkering:** Assembling and programming microcontrollers, such as Arduino and Raspberry Pi, to create unique DIY projects and gadgets.
- **Hiking and Nature Photography:** Exploring the great outdoors and capturing its beauty through the lens, providing a refreshing escape.
