Introduction

“Offer Seamless Buying Experience for Your Customers”

With the commencement of advanced payment technology and increased customer expectations, it has become significant for retailers to use POS software and switch to cloud solutions for their businesses.

POS systems offer customer-focused experience, enhanced efficiency, and enable to make data-driven decisions. Today, POS systems are not only inclined to payments. They also help to streamline business processes through sales management, inventory tracking, analytics, customer data collection, and much more!

In this paper, we have curated an in-depth comparison between Odoo and other biggest players in the POS App market. Our vision is to provide a comprehensive and insightful analysis of these solutions through the features and capabilities of these POS software.

For a detailed comparison of several POS solutions, we have chosen three eminent ones- **Odoo**, **Gofrugal ServQuick**, and **Petpooja**. We have compiled a table outlining the key features essential to any POS platform and integrated business management tools that enhance point-of-sale functionality.

But first, let's discover  the different solutions

Point of Sale Software

Odoo

A versatile, intuitive, user-friendly software built to simplify business operations and fulfill the industries' demands- Odoo is one of the most adept POS solution providers. With more than 82 business apps fully integrated and thousands of community modules, this open-source software caters to every sector and company size, making it a major player in the market. This open-source software counts more than 20,000 downloads daily, making it the most installed app suite and a direct competitor to other software such as **Gofrugal ServQuick** and **Petpooja**.

Amazing employees deserve amazing software.

User Interface

The user interface (UI) often takes a backseat. Many solutions tend to channel their focus into core functions and back-end development, often leaving the design of an effective UI by the wayside. Unfortunately, this oversight can lead to less-than-ideal user experiences, which, in turn, impact the efficiency of operations and overall customer satisfaction.

Efficiency and customer satisfaction are crucial in the POS area. To excel, POS software must seamlessly align with the unique needs and aspirations of businesses, enabling them to serve their customers effortlessly. The UI plays a pivotal role here. It acts as a bridge, translating user preferences, habits, and skills into a software experience that functions harmoniously.

A meticulously designed UI plays a central role in diverse facets of POS operations. It ensures swift and precise transactions, reduces the learning curve for staff, enriches customer engagement, facilitates efficient data collection, accommodates changing needs with ease, and mitigates the risks of costly errors. All of these contribute to enhanced operational efficiency and customer satisfaction.

To delve deeper into this matter, let's discover the back-end world of Odoo POS, Gofrugal ServQuick, and Petpooja. We'll observe their interface designs, all with the aim of evaluating their usability and efficiency.

Order Screen

Odoo

The Odoo POS interface displays a list of items on the left, including Bacon Burger (₹ 450.00), Coca-Cola (₹ 132.00), Schweppes (₹ 132.00), Solay Tuna Sandwich (₹ 180.00), Green Tea (₹ 282.00), and Espresso (₹ 282.00). The total amount is ₹ 1,458.00. The main area shows a grid of food and drink items with their respective prices, such as Bacon Burger (₹ 450.00), Burger Menu (₹ 400.00), Cheese Burger (₹ 420.00), Chicken Curry Sandwich (₹ 190.00), Club Sandwich (₹ 204.00), Coca-Cola (₹ 132.00), Espresso (₹ 282.00), Fanta (₹ 132.00), Funch (₹ 436.00), Green Tea (₹ 282.00), Ice Tea (₹ 132.00), Lunch-Maki 1Pcs (₹ 720.00), Lunch Salmon (₹ 628.00), Lunch Temaki mix 1Pcs (₹ 840.00), Margherita (₹ 420.00), Milkshake Banana (₹ 216.00), Minute Maid (₹ 132.00), Mozzarella Sandwich (₹ 234.00), Pasta 4 formaggi (₹ 330.00), Pasta Bolognese (₹ 270.00), Salmon and Avocado (₹ 555.00), Schweppes (₹ 132.00), Solay Tuna Sandwich (₹ 180.00), and Vegetarian (₹ 420.00). The bottom section includes a payment summary with a total of ₹ 1,458.00 and options for Cash, Credit Card, and UPI.

Gofrugal ServQuick

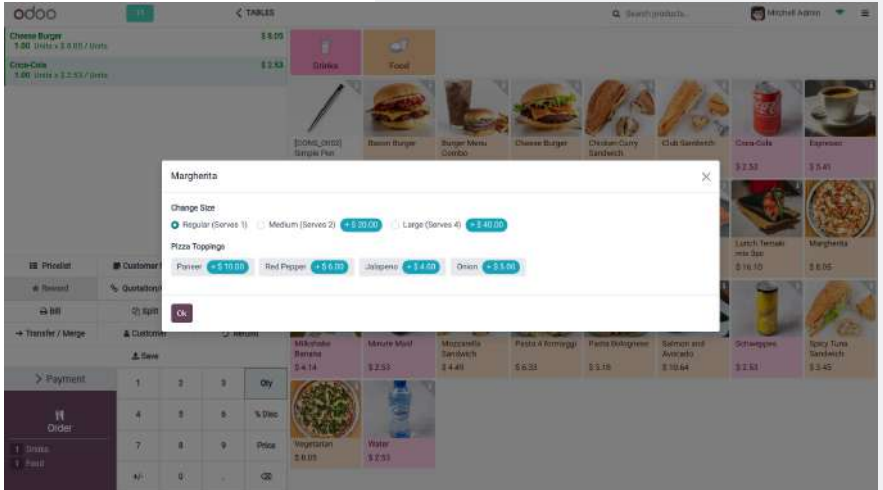

The Gofrugal ServQuick POS interface shows a grid of food items including Mutton Biryani, Non Veg Meals, Chettinad Chicken, Chicken Fried Rice, Pepper Chicken, Tandoori Chicken, Grill Chicken, Prawn 65, Paneer 65, Mushroom 65, Fish Curry, and Pepper Fish. The right side displays a detailed order summary for Mr. Manoj Kumar, including the address (AMC Road, Chennai) and a list of items: Mutton Biryani (₹ 340.00), Tandoori Chicken - Half (₹ 590.00), Prawn 65 (₹ 310.00), Butter Naan (₹ 200.00), and Hyderabad Chicken Dum Biryani - Family Pack (₹ 750.00). The total amount is ₹ 2,190.00, with payment options for Cash, Credit Card, and UPI.

The screenshot displays the Petpooja POS system interface. At the top, there is a header with the Petpooja logo, a 'New Order' button, a search bar, and a support contact number. Below the header, the interface is divided into several sections:

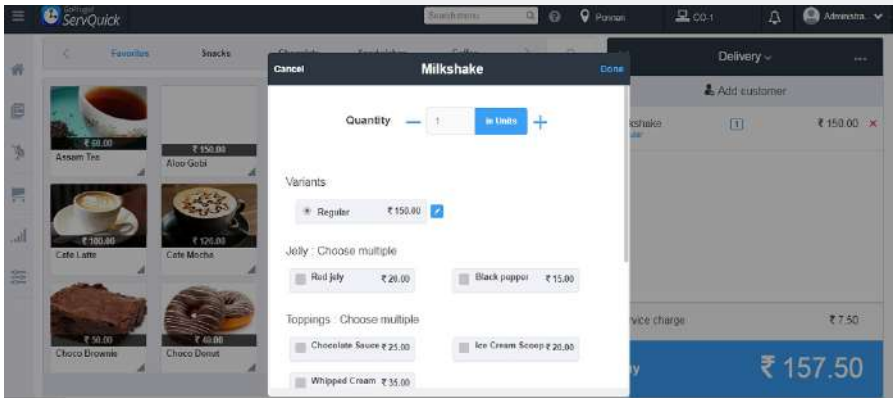

- Menu:** A grid of menu items categorized by type (Coffees, Teas, Snacks, Sandwiches, Pizzas, Burgers, Indian Gravies, Accompaniment, Rice, South Indian, Combos, Waffles). Each item has a name and a price.
- Order List:** A table showing the current order items with columns for 'ITEMS', 'CHECK ITEMS', 'QTY', and 'PRICE'. The items listed are 'Cappuccino' (139.00) and 'Chocolate Milk Shake' (250.00).
- Payment and Action Panel:** A bottom section containing payment options (Cash, Card, Due, Other, Port), checkboxes for 'Split', 'Complimentary', 'Sales Return', 'It's Paid', and 'Loyalty', and buttons for 'Save', 'Print & eBill', 'KOT', 'KOT & Print', and 'Hold'. The total amount is displayed as 446.

Petpooja

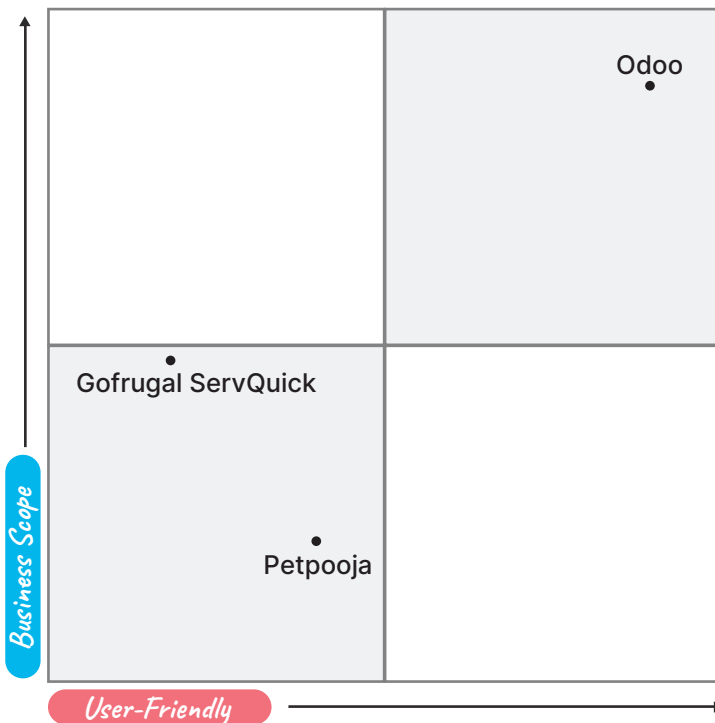

The screenshot displays the Petpooja web application interface. On the left, a table lists pet records with columns for 'Table No.', 'No. of Patients', 'Last Information', 'Area/Room No.', and 'Status'. The table contains several rows of data, each with a green 'Status' button. On the right, a 'Totals View' section shows a calendar grid with buttons for each day of the month. Above the calendar, there are navigation buttons: 'Previous', 'Next', and 'Add'. A red arrow points from the 'Add' button to the calendar grid. Below the calendar, there are red decorative lines.

Different solutions, Different needs

In order to excel in business, it is important to streamline ineffective processes. For it, you need to opt for the right software. This leads to the analysis of certain parameters such as features, functionality, workflow, etc.

Business Scope and User-friendliness

Business scope evaluates the software functions, specifications, usability, customization capability, and integrations with other tools for your business growth.

User-friendliness measures how software is user-friendly to use and whether it is adaptable to the business according to its tailored needs or not. It evaluates how the software is simple to install along with the updates requiring minimal effort to understand & avoid time-consuming training and procedures. It should also adhere to the industry standards and be efficient after all.

Odoo is an integrated platform that different businesses and organizations can utilize to fulfill their requirements by leveraging its multifunctionality and enhanced features. It has exceptional Point-of-sale capabilities and goes far above it.

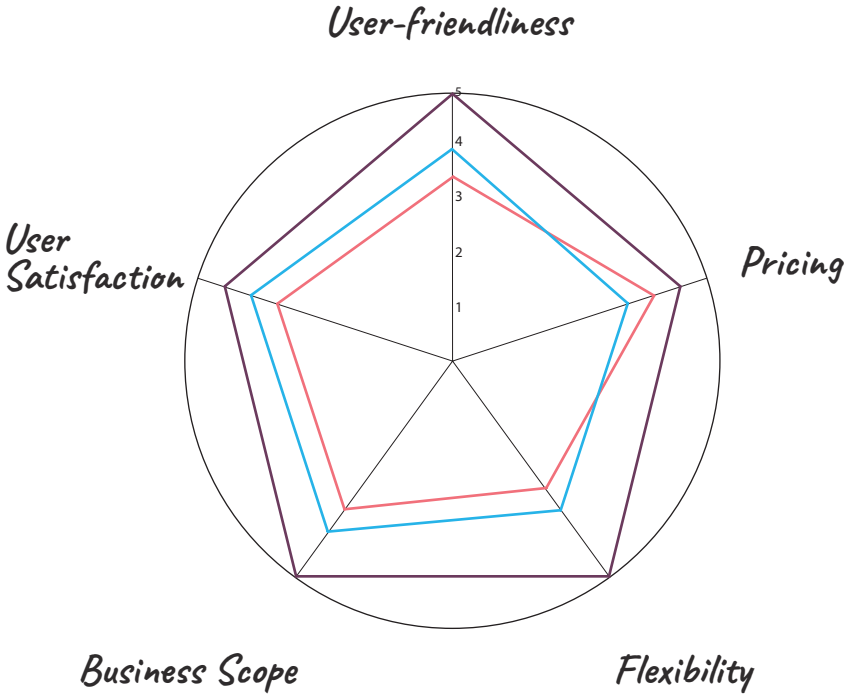

This all-encompassing software is highly customizable, integrates multiple applications, and accelerates businesses with an open-source nature. Its open-source nature empowers a thriving community resulting in a vast repository of community-contributed applications. Odoo Point of Sale offers immaculate services for restaurants and retail stores.

Odoo, Gofrugal ServQuick, and Petpooja have introduced a radical transition to the Point of Sale (POS) landscape. **Gofrugal ServQuick** offers more refined offer management and integration with food delivery platforms. It has an efficient reporting tool. But, it doesn't work on Linux platforms (on-premise) & upgrading or applying patches to the application is hectic in it. Also, it is not possible to archive Old POS in it. It is user-friendly, but custom development can only be done by the Gofrugal itself. It suffers from customization limitations and limited scalability.

Petpooja helps restaurant owners simplify their business operations from online ordering, table reservations, seat management, and reporting, to analytics, etc. However, its user-interface is not up to the mark- not intuitive. Also, inventory management is somewhat complicated and it suffers from limited integration with third-party applications. Part payments are difficult to process hassle-free in it. However, Petpooja can be utilized by users with minimal training.

Value Proposition

Odoo

Gofrugal ServQuick

Petpooja

Conclusion

While opting POS software for business, certain major factors matter such as usability, customization, installation & setup, integration capability, and how much it can streamline your workflows. You need to decide to what degree the particular solution aligns with the unique needs of your business.

If you are looking for a **specific point-of-sale solution & integrated platform for fulfilling all your business needs**, then Odoo can be a great choice for you. It offers advanced options for POS and helps in the efficient management of restaurant or shop operations. It is a robust platform, fully customizable, offers an intuitive interface, and supports hassle-free payments.

Gofrugal ServQuick and **Petpooja** can be helpful in restaurant management. However, Gofrugal ServQuick's customization capability is not up to the mark and lags in integration with online stores or online websites. The Petpooja user interface is imperceptive. Part payments are difficult to process hassle-free in it. It suffers from a lack of advanced features which are needed to become adaptable to business complexities.

On the other hand, **Odoo** is user-friendly and has modern user interface, offers a wide range of advanced features, easy to use and implement. It is an All-rounder to help in delivering seamless services from restaurants and shops!
